

Drive eBook sales across platforms

ContentStore is a hosted eBook delivery and distribution platform with features for converting, showcasing, marketing, and distributing content in multiple ways. ContentStore drives eBook sales over the web and mobile platforms including iPad, Android, and web apps

- Flexible**
Choose from different available feature sets and create your own e-BookStore quickly and easily
- Adaptable**
Sell content at book, article, or chapter level to access untapped revenue streams and models
- Multilingual**
Gain access to new markets and revenue by supporting multiple languages
- Define and Control**
ContentStore's interface enables publishers and institutions to implement their e-content strategies while protecting content through a variety of DRM options

Multiple Options

Enable conversion, storage, showcasing, selling, promotion, and distribution of e-content

Extensive Administration

Delivers platform management and e-content delivery

DRM Services

Technology partnership with Adobe to provide Digital Rights Management Services

Global Content Formats

EPUB, HTML, PDF, Flash, or a combination

Social Media

Enable content delivery on social platforms like Facebook, Twitter, Google, Disqus, and Tumblr

Integrated e-Commerce Model

Allows publishers the choice of retaining their own payment gateway or using the in-built checkout function to sell online

Mobile

Distribute content across all major mobile platforms and devices

Distribution

Instantly distribute content across all popular distribution channels including Apple, Amazon, Barnes & Noble, Sony, Kobo, and Overdrive

Library Module

Libraries can create and subscribe to book bundles, and implement a library loan service

COUNTER Usage Stats

Publishers and librarians can access COUNTER compliant and other usage statistics including access via SUSHI
